Professional Summary

Results-driven Software Engineer with 3+ years of experience building scalable web applications, REST APIs, and data-driven product features. Skilled in React, TypeScript, Node.js, and SQL, with a strong record of improving application performance, reliability, and user experience in agile engineering teams.

Technical Skills

Programming Languages: TypeScript, JavaScript, Python, Java, SQL, HTML, CSS

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Redux, Tailwind CSS, Jest, Cypress

Developer Tools: Git, GitHub, Docker, Postman, VS Code, npm, Jira, Figma

Databases: PostgreSQL, MySQL, MongoDB, Redis

Cloud & DevOps: AWS, Vercel, Netlify, GitHub Actions, CI/CD, Linux

Experience

BrightWave Software – Austin, TX

2024 – Present

Software Engineer

- Built reusable React and TypeScript components used across customer dashboards, reducing duplicate UI code by 30% and improving delivery speed for new features.
- Developed REST API endpoints in Node.js and Express.js for reporting workflows, supporting high-volume account activity and improving average response times by 25%.
- Partnered with product managers and designers to ship accessibility-focused interface improvements that increased task completion rates for core user flows.

CodeBridge Labs – Remote

2022 – 2024

Junior Software Developer

- Implemented full-stack features for internal operations tools using React, Python, PostgreSQL, and GitHub Actions.
- Automated manual data validation tasks with Python scripts, saving the support team 8+ hours per week and reducing recurring reporting errors.
- Wrote unit and integration tests for critical workflows, increasing test coverage and improving release confidence across biweekly deployments.

Projects

TaskFlow - Team Productivity App — React, TypeScript, Node.js, PostgreSQL, Docker

- Designed and built a Kanban-style project management application with authentication, role-based workspaces, task assignments, and activity history.
- Created normalized PostgreSQL schemas and optimized query patterns to keep dashboard load times under 500ms for common workflows.
- Containerized the application with Docker and configured GitHub Actions for linting, testing, and automated deployment checks.

InsightBoard - Analytics Dashboard — Next.js, Chart.js, Express.js, MongoDB

- Built an interactive analytics dashboard with filterable charts, CSV import, and saved report views for small business users.
- Implemented secure API routes with validation and pagination to support efficient browsing of large datasets.
- Improved frontend rendering performance by memoizing expensive chart calculations and reducing unnecessary component re-renders.

Education

State University

2018 – 2022

Bachelor of Science in Computer Science — GPA: 3.8/4.0

Central High School

2018

High School Diploma — Honors Program
